Crixis: An Academic Tracker

I. **The Problem**
- Throughout the school year, many outputs, activities, and quizzes will be given out, remembering each due date or simply placing it on your calendar can be easily forgotten. Many students receive low grades because they either; aren't prepared, forgot the date, or have no output, all because he/she couldn't keep track of requirements.

II. **Project Objectives**
- To help students be reminded of their pending projects and upcoming quizzes/activites/exams.
- To ----- students study or prepare
- Help students become more disciplined in their study habits

III. **Planned Features**
- A calendar system for students to easily input their upcoming projects, activities, quizzes, and exams.
- A set goal/expected score for each project, activity, quiz, and exam.
- A schedule input
- A possible notification system after every subject
- An alert system for near due dates
- A system UI

IV. **Planned Inputs and Outputs**
- **Input:**
  - Daily/Weekly schedule with time and day
  - Upcoming projects, activities, quizzes, and exams
  - A set goal/expected score for each project, activity, quiz, and exam.
- **Output:**
  - Notification alerts after each class/period and near due dates

V.   Logic Plan
